

## What's My Home's Value in Today's Challenging Market?

Free, No Obligation Over the Net - Home eValuation

Why waste your time with a "traditional" agent who might inflate the value of your home just to get your listing at 5%, 6% or 7%? Let us show you how today's Innovative Real Estate Professionals are Listing, Marketing, and Selling homes and how you can keep more of your equity at closing.

We use recent transaction data from homes in Your Neighborhood, not Generic info found on most websites. Your eValuation also takes into account and/or eliminates "distressed property sales" to give you a more accurate view of your property's "True Value".

Simply enter a few details and we will sort through the real estate clutter to give you an estimate of your home's True Value in today's very challenging real estate market.

Your eValuation is absolutely free and with no obligation, all we ask is that if you like what you see, please let the local member of The Real Estate Savings Center be one of the Agents you interview if and when you are ready to get your home sold. Thank you!
